

Company-wide document and business process management

Unified and future-ready: information management with Doxis4

ECM, BPM & collaboration on one technological platform

What makes Doxis4 stand out?

- Unified: Brings together ECM, BPM and collaboration on one uniform technological platform
- Scalable: A platform that grows with your requirements
- Intelligent: The Doxis4 platform utilizes cognitive services
- Agile architecture: Highly available and multitenant-capable
- Extendible and flexible: Create or add any number of applications and solutions with Doxis4
- Reduced IT complexity: Less administrative and integration work
- Proven security: Doxis4 has countless certifications, e.g. EU GDPR, ISO 14641-1: 2012-02, ISO-16175-2
- Deep integration made easy: SAP, Microsoft suite, etc.
- Unicode-compatible: Doxis4 is localized in 12 languages for international deployment
- Recognized by leading analysts: SER, with its Doxis4 platform, is positioned as a "Challenger" in the Gartner Magic Quadrant for Content Services Platforms 2018 and as a "Strong Performer" in Forrester's ECM Waves

Doxis4 empowers you to harmonize your information management and eliminate information silos.

Best practice: Eissmann Group Automotive

- Doxis4 as a company-wide ECM platform
- Currently over 2,300 internal users and more than 1,000 external partners
- SAP integration for invoice processing and eFiles

Streamline your IT complexity

At many companies, the number of IT systems in use grows with every year. The result: companies are spending more and more time, effort and money on administration, integration and operations.

What's more, every company department has its own set of requirements to optimize business processes, structure documents and share information. While the Accounting team uses an archive for invoices and documents, Purchasing relies on a file directory - but communication across the company is done via email. And so the IT system landscape grows and grows. Making matters worse, this myriad of systems inevitably poses security risks, slows down processes, causes media disruptions, and generates information silos.

With the enterprise content management (ECM) software Doxis4, IT managers get a service-oriented technological platform for content, processes and collaboration. This means they can cover a diverse range of departmental and company-wide requirements for document and process management.

Doxis4 enables company-wide DMS and BPM applications with only one technological platform!

"Doxis4's uniform and transparent approach to processes is a key reason why the continued existence of isolated solutions is no longer allowed."

Cornelius Hilbig, Head of Digital Services/IT,
Eissmann Group Automotive

Enterprise-ready:

One platform for many applications

Doxis4 has a service-oriented architecture (SOA) that forms the basis for all modules of the Doxis4 ECM platform: from inbound and invoice management to business process management, DMS and digital file solutions, to audit-proof archiving for all types of business documents. With a unified platform and a flexible combination of services, you can successively build your ECM system.

Why launch a new system for every business requirement when you can develop new business applications based on one software, Doxis4. You can also take the Lego approach and simply add services. Predefined solution packages and templates enable you to get started quickly.

*Think big – start small:
Get started with quick and easy applications
and benefit from the scalability of a unique
and modern technological platform.*

Doxis4 grows with your requirements

The Doxis4 ECM platform is scalable to your requirements: Whether you have thousands of users, billions of documents and workflows, operate around the globe, or all of the above – the Doxis4 components (architecture, databases, applications and storage) grow to meet your requirements.

Does your company need an ECM system that integrates entire business ecosystems – including customers, partners and suppliers – with internal digital processes? Web-based Doxis4 collaboration solutions cover all of your needs.

The Doxis4 platform offers the technological basis for all documents and business process management applications in your company. Doxis4 empowers you to create countless digital solutions: inbound processing, archiving, document and process management, digital files for contracts, HR and suppliers, collaboration in project teams and with external business partners, and so much more.

Best practice: Duravit AG

- Doxis4 as an international and company-wide ECM platform for Duravit
- eFile solutions with ERP connection
- Compliant, audit-proof archiving system

A solid foundation

The more data and documents a company generates, the more urgently it needs intelligent and high-performing technologies to manage them. Our uniform metadata approach covers all information objects. In other words, you can consistently manage, quickly find and easily assign rights to documents, eFiles and processes.

In a global business world, applications need to be available 24/7. Doxis4 makes sure that your business operations are fail-safe at all times. Applications, databases and storage are set up for high availability to ensure top performance and to provide a safeguard in case of system failure.

Doxis4 stands for compliant document and process management, as its many certifications demonstrate. Doxis4 is certified for the EU GDPR, ISO 16175-2, ISO 14641-1: 2012-02 and many domestic legal regulations and standards. It fulfills the requirements of audit-proof electronic archiving.

Brochure: Good reasons for certified ECM software

- Fulfill legal requirements (EU GDPR, etc.) with Doxis4
- Work in compliance with industry standards (ISO, etc.)
- Meet manufacturer-specific requirements
